After I finish my Ph.D., I will continue to work in my laboratory as a research assistant...Taiwan is undoubtedly one of the best environment and resources for electronic engineers and researchers in Asia, so I would love to avail this opportunity in order to build my career. My advice to overseas students who want to study in Taiwan is to come here without any doubts of career, knowledge and any kind of fears. This place is a peaceful land of great opportunities.

Quick Facts

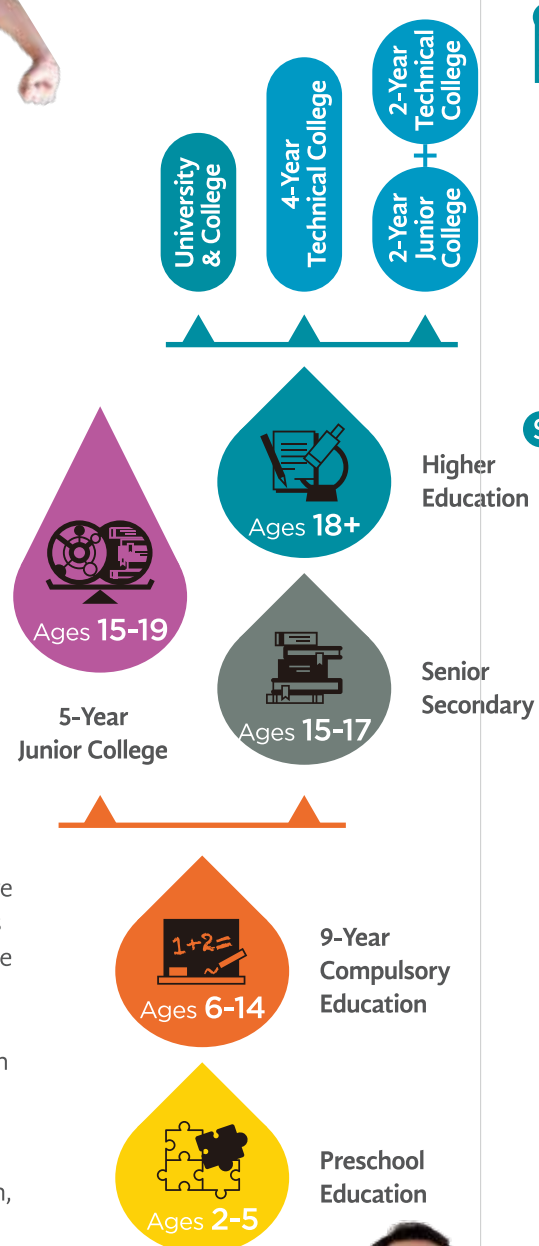

Studying in TAIWAN

Taiwan's Education System

In Taiwan, students can pursue higher learning at two-year and four-year colleges, and universities. University undergraduate programs usually require four years of study; graduate programs leading to a master's degree require one to four years; and doctorate programs require two to seven years. Some programs require an internship that can be as short as one or two months or as long as two years.

In most institutions of higher education, the academic year begins in August or September and ends in August the following year. The academic year has two semesters: the first semester is from August to early the following year, usually January (depending on the date of Chinese New Year), and the second semester usually begins in February, and ends in July.

Choosing Where to Study & Applying

The curriculum at most universities focuses on academic studies and research. Universities of technology focus on training practical and specific skills. A wide range of colleges and universities welcome international applicants. Applicants can choose a college or university based on their personal interests and the courses offered. A list of universities and colleges, public and private, can be found on the **Study in Taiwan** (www.studyintaiwan.org) website.

STUDENT Life in TAIWAN

There are a lot of international students, so you meet lots of interesting people every day, and they all have stories to tell. But the best thing that I really appreciate is the teachers in my department, because most of them they studied abroad by themselves. So they have very refreshing teaching techniques and they're also very empathic which is very important for foreign students, I think.
