The Rise of a \$460 Billion AI and Smart City Industry

The global market for AI in smart cities is expected to reach USD 460 billion by 2034, growing at a compound annual growth rate (CAGR) of 27.8% between 2025 and 2034. In the future, AI in smart cities will primarily focus on service management and efficiency improvement, with significant market size and strong growth potential.

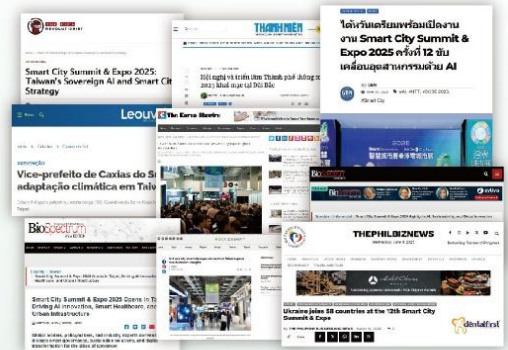

Benefits at SCSE

Worldwide Recognition

The 2025 SCSE drew strong global media attention, with nearly 2,000 international stories. Journalists joined a curated media program featuring briefings, tours, and press conferences, resulting in broad coverage that highlighted SCSE's global visibility and leadership in smart city development.

Toulouse, France

It was a very professional exhibition. I discovered several interesting solutions and met stakeholders we could collaborate with.

Budapest, Hungary

I was genuinely impressed by SCSE. It was rich in content, and the overall organization was very professional. I even bumped into some familiar faces from neighboring countries and NGOs.

Negeri Sembilan State, Malaysia

SCSE provides an opportunity for cities and enterprises from around the world to exchange insights on the most advanced digital applications and AI technologies.

Orange County, US

This is really one of the most important conferences you can go to in the world!

Shizuoka City, Japan

This participation not only allowed us to learn a lot about Taipei City's advanced technologies, but also enabled us to make many new friends. It was truly a rewarding experience!

Rio Grande do Sul, Brazil

These were days of great learning! More than fifty articles were published in the entire Rio Grande do Sul press.

Get ready for SCSE 2026

NEW

City Vision in Action

Real cities. Real problems. Real solutions!

Benefits

- ✓ Exclusive booth pricing
