

TIHTC

2020 Emergency Care & Burn Injuries Management Project Training Program

Online Application

INTRODUCTION

The Taiwan International Healthcare Training Center (TIHTC) was established in 2002 by the Ministry of Health and Welfare (MOHW), and executed by Taipei Hospital, MOHW. TIHTC offers training and exchange programs for medical professionals around the world to continue their clinical training in Taiwan.

OBJECTIVES

Emergency care is an essential part of the health system and serves as the first point of contact for the acutely ill and injured around the world. In the New Taipei Water Park dust explosion incident in 2015, where over 500 patients were burned and an average burned body surface of 40%, the prompt emergency response and timely treatment managed to keep the death toll at a minimum. The objectives of this program are to improve the concepts and skills in managing emergency care of the frontline healthcare providers.

This program includes the professional medical teams, institutions, associations, and foundations related to emergency care and burn injuries to share their expertise in large scale burn care, wound and scar care, pain and infection control, nutrition, rehabilitation, as well as mental care.

Dual-Track Training Program

2 weeks project training plus 1-4 weeks clinical training for emergency medicine

TIHTC will arrange international medical practitioners who apply for the dual-track training program to the clinical department for learning clinical cases under specialists. The applicant will gain a deeper understanding from a clinical perspective, such as emergency medicine from triage to follow-up medical treatment.

Note: applicant has to meet the requirements of clinical training program

Training Duration: Sep 14th - Sep 25th, 2020
Application Deadline: Aug 14th, 2020

This training is co-organized by Taiwan Society of Emergency Medicine and Taiwan Society for Burn Injuries and Wound Healing
