**A VIRUS-FREE LIFESTYLE
IN TAIWAN.**

**YOU CAN KEEP PURSUING
YOUR PROFESSIONAL GOALS
HERE!**

Though the world is suffering from COVID-19,
Taiwan is still a place where people are:

#still going to work,

#going to school,

#gathering

WE STILL LIVE OUR LIVES NORMALLY.

WE WORK HARD, PLAY HARD!

CULTURE EXCHANGEING EXPERIENCE

Since you arrive here, this rich Asian culture is here waving to you. To unveil the mysteries, we hold several trips and workshops annually. Stay tuned with our latest news!

WORKSHOPS

We care more not only inside your classroom but support you for more practices to achieve your professional goals:

-Workshops we held this year- Python, Tableau, Google Analytics, NextGen & Stanford.

XMAS PARTY

The biggest event among the year! We play in a western style, bow tie and formal dress, and will never make you boring.

Just suit up! Enjoy the night and the feast!

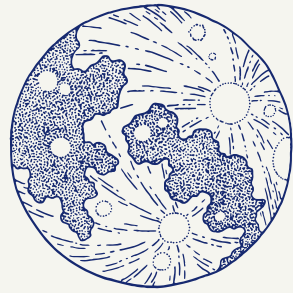

-IMBA'CK!- ALUMNI REUNION

Our alumni can provide business connections, organize reunions, experience & industry sharing...

These could benefits you a lot!!

WHAT MAKES US A UNIQUE MBA PROGRAM?

DIVERSITY

We are proud to gather students from 43 countries and six continents. By hanging out with peers from diverse backgrounds after class, IMBA students experience cultural learning in a global setting that promotes creativity with differing viewpoints and can collaborate to innovate better solutions with an open mindset.

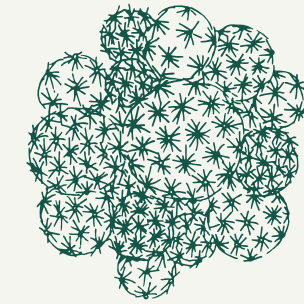

CLOSE INDUSTRY CONNECTION

This strategic location makes it a perfect place to learn about the technology sector. As part of the classes, they get involved in projects in cooperation with the local companies, such as Lite-On, BenQ, PwC, and Zyxel, etc. The variety of companies nearby also create opportunities when it comes to finding internships.

PARTICIPANT-CENTRED LEARNING

The professors of our faculty put a great emphasis on active participation in the class. IMBA students are mainly absorbing the teaching material through intense classroom discussions, case studies, group projects, as well as individual and group presentations. And they are also encouraged to take part in academic competitions organized inside or outside of the campus.

TECHNOLOGY FOCUS

Benefiting from National Tsing Hua University's strength in science and engineering, as part of the College of Technology Management, an interdisciplinary business school, IMBA integrates those strengths into the curriculums. IMBA students are encouraged to study and learn from other departments by taking some of the courses as the electives.

LET'S SEE
WHAT OUR **ALUMNI** SAYS!

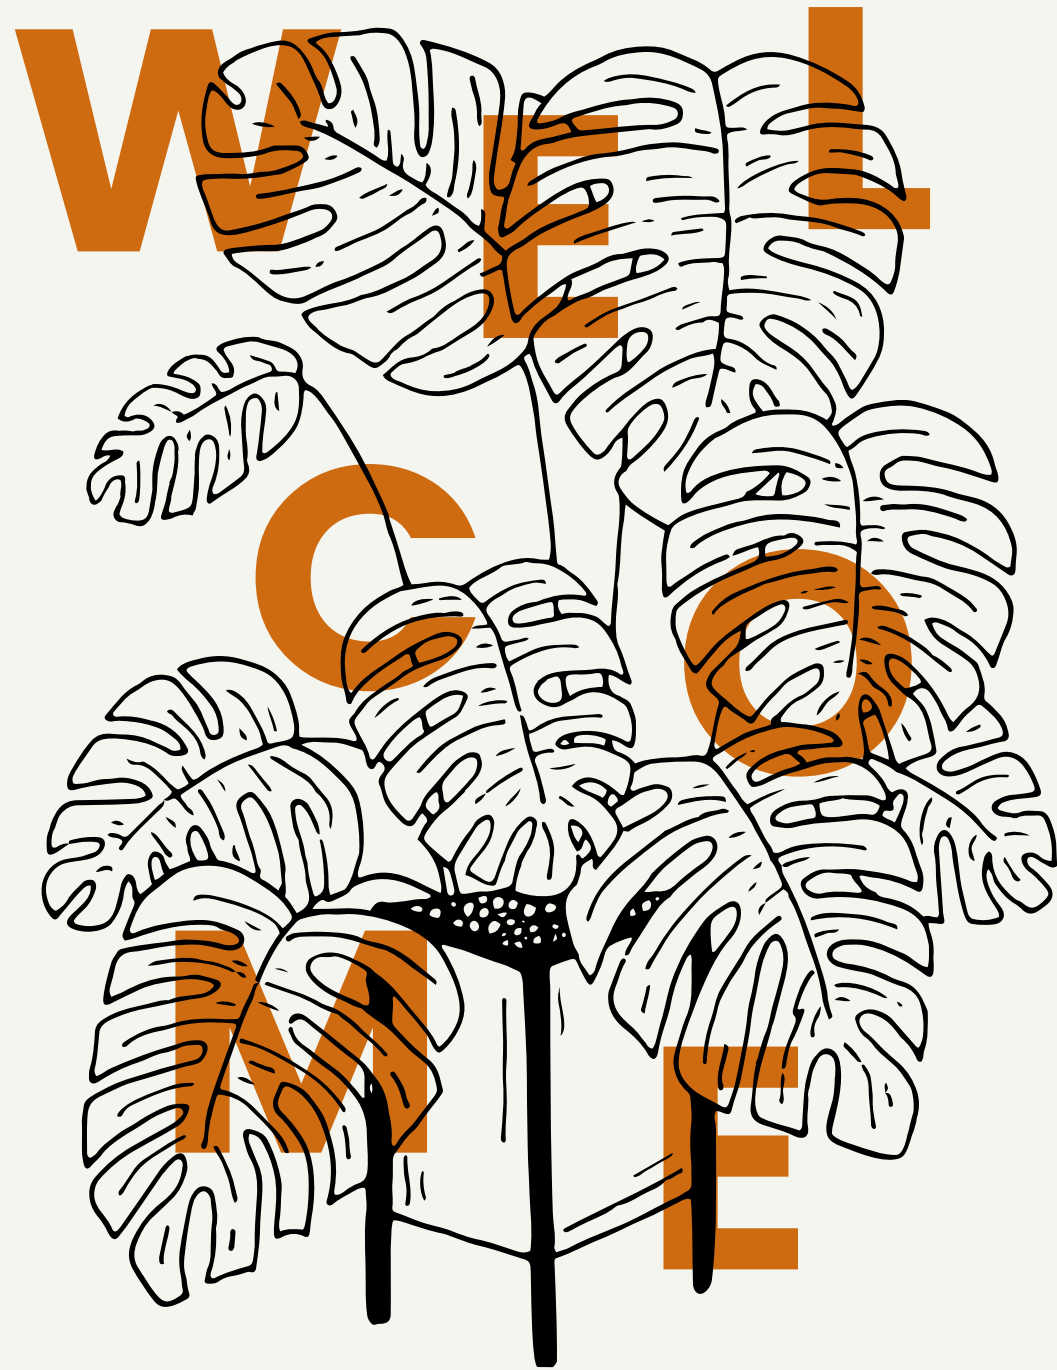

IMBA

BECOME ONE OF US.
BECOME THE FUTURE LEADER!

IS EVERYTHING CLEAR?

Please feel free to let us know if you have further questions.
