4 reasons you must join TIWW & CE Taiwan

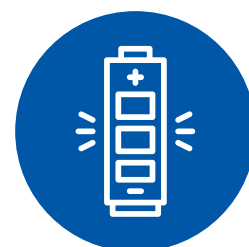

The only professional water + green industry procurement platform in Taiwan, an all-round comeback.

International forums hosted by the Water Resources Agency (WRA) to promote the industry-government-academic-research exchanges.

Incorporation of industrial supply chains to provide complete water and circular economy solutions.

Convergence of business opportunities at one place where more than 4,500 professionals from home and abroad will gather.

Water and Circular Economy to Create Synergy in Resource Sustainability!

"Taiwan International Water Week (TIWW)" received a very warm response. This year, TIWW will be concurrently held with the "Circular Economy Taiwan (CE Taiwan)". You will see equipment, devices, facilities and accessories for recycled water treatment, transportation storage, green infrastructure, drinking water purification at the terminal ends, fluid automation and control and so on. Also, the concept of green supply chain which from "linear economy" to "circular economy" will be well demonstrated in exhibition by various eco-tech product.

TIWW Offers the Most Comprehensive Water Solutions

Due to the global water shortages, Taiwan government invested about US\$8.3 billion for "Water Environment Construction" to tackle this issue. Also, Taiwan water purifier market stood at around US\$ 655 million in 2017. Taiwan's water treatment equipment industry is a multi-faceted and complex industry which include water reclamation technology, pipeline management, drinking water purification, and so on. TIWW surely the best choice for suppliers to explore new business opportunities in Asia!

CE Taiwan Showcases a New Era of Green Supply Chain

As economic development also incurs wastes. A new concept of recycle the wastes into the supply chains, that forming a new sustainable economic model called the "Green to Gold" cycle. Taiwan government has been promoting the "5+2 Industrial Transformation Plan" to encourages the industries to shift from the traditional "linear economy" (mining, manufacturing, using, and discarding) to a "circular economy with sustainable resources".

Exhibit Areas

- 💧 Reclaimed Water & Treatment
- 💧 Transport & Storage
- 💧 Green Infrastructure
- 💧 Water Purification Equipment & Drinking Water
- 💧 Process Control Technology & Process Automation
- 💧 Public Sector & Related Services

Exhibit Areas

- 🔄 Eco-Tech
- 🔄 New Business Model

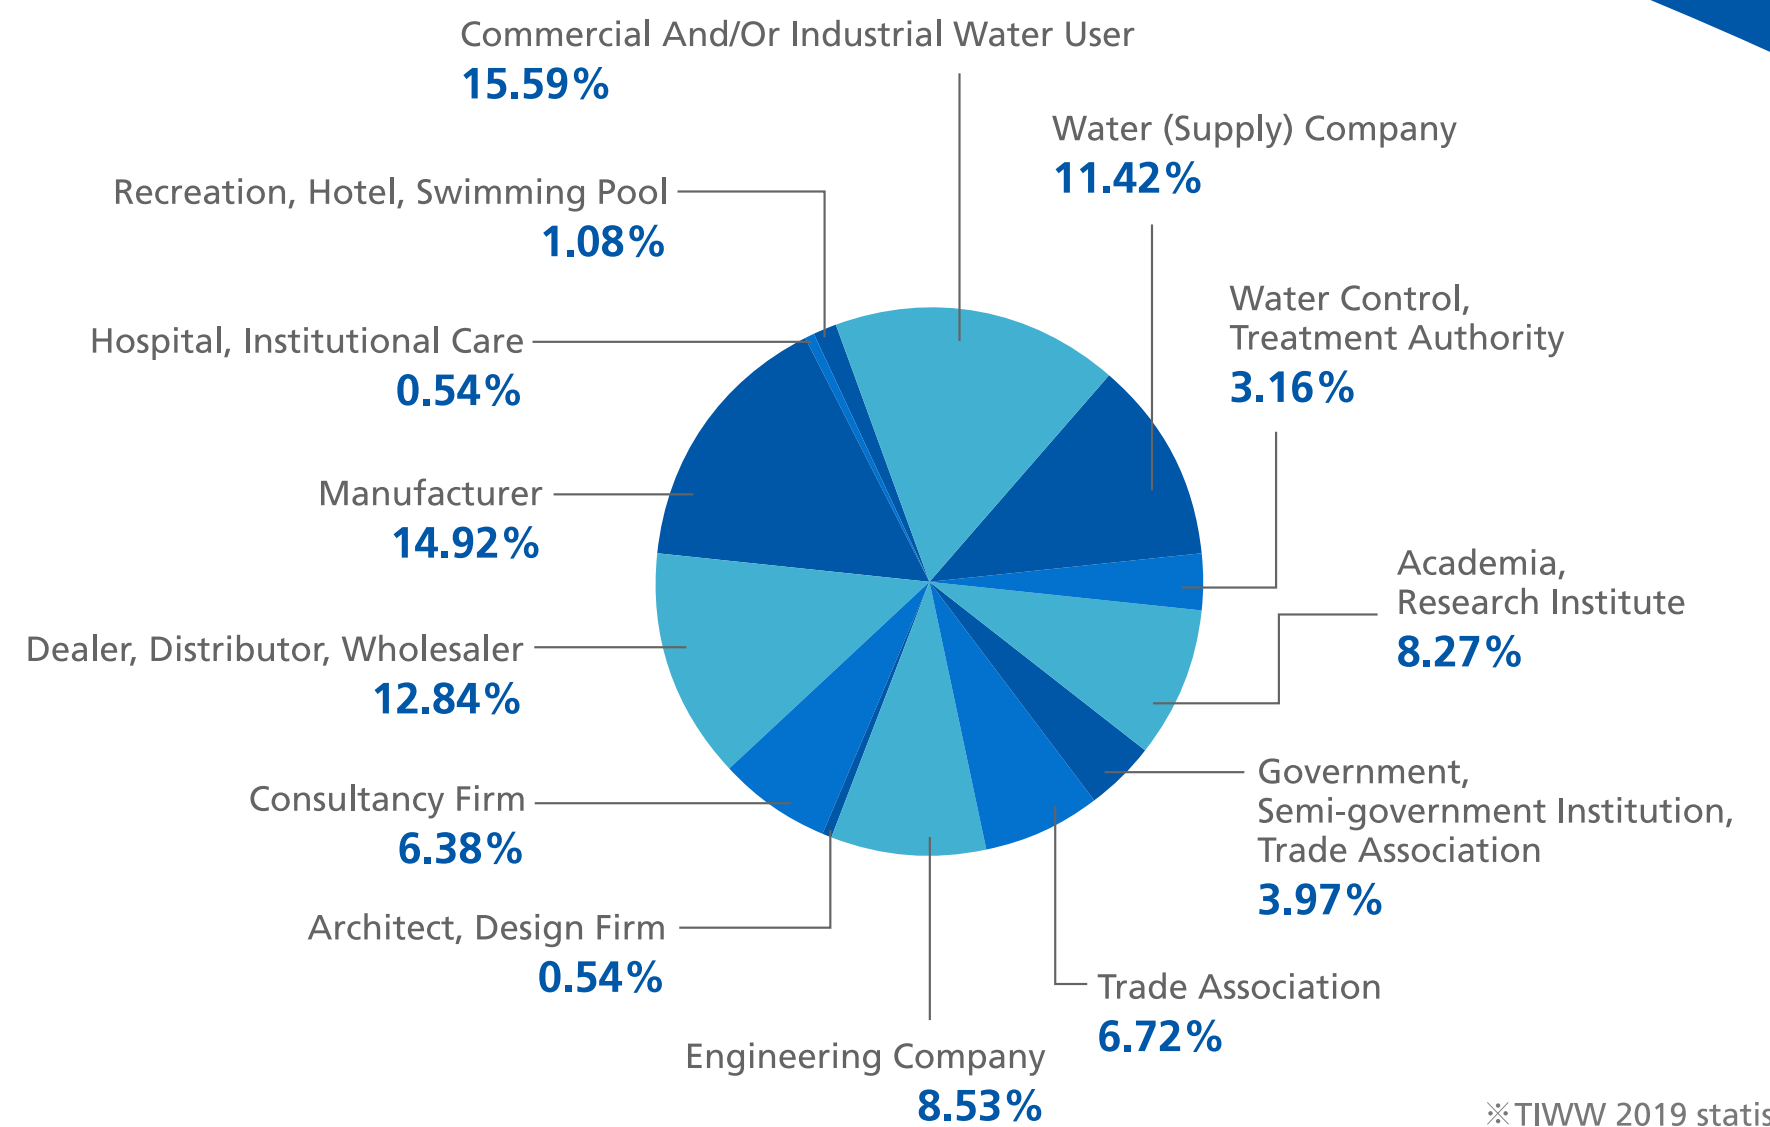

A Well-Praised Achievement in 2019

Testimonials

We provide all kinds of solutions for water treatment. We want to promote our technology for government sector and private sector in Taiwan which is a **great potential market**. And I think we definitely achieve our goal.

- Mr. Rosenfeld
Sales and Solution Manager, Israel

I found the government support was very helpful for the water industry and the event. It shows how much **Taiwan is investing in water technology** and trying to find solutions to climate change.

- Ms. Tempest
Press, Spain

Why we come here is because we want to explore Taiwan market and get contact with potential customers, especially in industrial field. On the first day of the show alone, a lot of people came to us and we think **Taiwan market is really big and attractive**.

- Mr. Röck
Area Sales Manager, Germany

Events

- 💧 **"Water for the Future" Forum**
(Organizer by  Water Resources Agency, MOEA)
- 💧 **"Agreement on Government Procurement" One-on-One Procurement Meetings**
- 💧 **One-on-one Procurement Meetings**
