

About Us

National Cheng-Chi University, as one of the most prestigious universities in Taiwan, prime at its humanitarian and social science research, hosts over 2 thousand international students each year. As the 10th college established in 2018, the International College of Innovation (ICI) is the first college in Taiwan aiming to promote innovative education for global studies and management. ICI provides professional, integrated, and comprehensive training opportunities that encompass various disciplines supported by our core value—to cultivate students who aspire to become well-rounded and innovative leaders. Our curriculum modules are designed to enhance student abilities for all professions and alike in fields such as social science, international laws, business analysis and data science. We provide multilingual trainings and provide regular lectures and seminars for students to be well-versed in targeted fields whether for research or for future career placements. Our goal is to cultivate students who aspire to envision themselves as future leaders in global governance. Be Inspired, be Creative, be Innovative—lead the future with ICI.

"ICI welcome passionate young talents who value sustainable development, diversity and culture inclusion. Join ICI to create innovative solutions for global issues at all fronts."

NATIONAL CHENGCHI UNIVERSITY

Program Features

INNOVATIVE CURRICULUM

Innovative teaching modules that transverse universities, nations and disciplines

CREATIVE THINKING

Transform traditional specialist-education to talent cultivation of all facets.

INTERNATIONAL VISIONS

English-taught courses with abundant opportunities for overseas exchange

Curriculum Design

Students in their 1st and 2nd year do not have specific majors. Students would choose 3 elective courses covering 2 of the 3 specializations (Globalization & Democratic Governance, Asian Society and Sustainable Development, and Global Technology & Innovation Management) in the 3rd year. They may choose to engage in exchange programs in their 4th year and are generally encouraged to take internships at domestic or overseas governmental/non-governmental institutes and enterprises. ICI's tailor-made curriculum structure aims to inspire students' creative solutions for global issues.

Global Technology & Innovation Management

Globalization & Democratic Governance

Asian Society and Sustainable Development

ICI integrates the best resources available across disciplines, institutions, and nations to develop front-running curriculum that inspires innovations and critical thinking. Adopting an interdisciplinary approach and emphasizing on current issues and trends, our curriculum structure empowers students' analytic skills to tackle complicated global issues (e.g. climate changes, global health governance, artificial intelligence, technology and human rights). ICI invites international stakeholders or world-renowned scholars for lectures and seminars to equip the students with global vision and problem solving skills to prepare future talents for their success in global leadership.
