

## **Taiwan Healthcare + Expo Invitation**

### **Witness Asia's digital health transformation and create unprecedented opportunities with global healthcare players**

Taiwan Healthcare+ Expo (2018.11.29-12.02) is a signature expo centered around advanced medical technologies as the key driver, with collaborative inputs from the ICT, electronics, medical, biotech, pharmaceuticals, medical devices, and precision machinery industries. By strategically connecting all health-related sectors from all over the world together in one place, Taiwan Healthcare+ Expo is accelerating the advancement of the health industry by sparking unprecedented cross-industry collaborations that drive disruptive innovations. This year, the focus of the expo will be on the digital transformation of healthcare. The expo will gather multi-national tech giants such as Foxconn, NVIDIA, IBM Watson Health, Google and more! We sincerely welcome you to come discover new business opportunities and collaborations with global health industry players in Taiwan.

### **Why Taiwan**

In this digital era, the global health industry is currently undergoing a revolutionary transformation process, and Taiwan has unique advantages in contributing a significant part to this transformation:

1. **Advanced Medical Specialties**- Taiwan's world-class medical centers consistently offer exceptional niche medical services, with notable achievements in multiple specialties, including liver transplant, reconstructive surgery, reproductive health, minimally invasive surgery, and treatment of lung cancer. Taiwan's medical centers even serve as the training centers of choice across Asia for various specialties and procedures.
2. **World's Tech Supply Chain**- Taiwan serves as the heart of the world's tech supply chain, offering high-quality products from IC design, semiconductor, to electronics. Taiwan's leading IT and electronics manufacturers have been supplying products to multinational tech corporates for decades. Now they are the key drivers of healthcare innovation, accelerating AI, IoT and robotic applications for the entire healthcare and biomedical industry.
3. **New Drug Development**- Taiwan's pharmaceutical R&D and manufacturing capabilities are of international standards. Currently there are multiple FDA approved new drugs for the treatment of AIDS, pancreas cancer, kidney disease, and infectious disease that were developed in Taiwan - making Taiwan a leader in Asia's new drug development.

### **Registration information**

The online registration(<https://expo.taiwan-healthcare.org>) is now open. Registration is free of charge (by invitation only), and you will have 4-day access to the expo, B2B partnering, industry talks, and more! Please do not hesitate to let us know should you have any question or concern
